

BIO-PANTENOL Dexpanthenol 5%

Moisturizing and Skin Repair Ointment

Ointment

1 g of ointment contains: Dexpanthenol 0.05 g.

How it works?

Dexpanthenol, the active ingredient of the ointment BIO-PANTENOL, is transformed in the body into pantothenic acid. The active form of pantothenic acid in tissues is the coenzyme A. Coenzyme A is essential for the metabolism of carbohydrates, fats and proteins, and detoxification of some metabolic products. At the level of healthy skin, these processes result in the preservation of the proper function. It provides the skin with the necessary nutrients, gives it smoothness and radiance and increases elasticity.

BIO-PANTENOL ointment is recommended for:

- Skin care after sun exposure;
- Irritation and rash, especially on skin folds;
- Dry, chapped lips and breast nipples;
- Atopic, irritated skin in the pauses between medical ointments treatment;
- Skin care in disorders of peripheral blood circulation;
- Limited face and body regions: dry and chapped skin of hands and cuticles, cracked heels and feet;
- Care for older, dry and tired facial skin.

Ingredients: Aqua, Petrolatum, Lanolin, Panthenol, Sorbitan oleate.

How to use?

BIO-PANTENOL ointment applied to skin 2-3 times a day in a thin layer and gently rub. Breast-feeders are recommended to apply the ointment on nipples after every nursing. For facial skin care BIO-PANTENOL ointment should be applied every night to previously cleaned skin.

Warning:

For external use only.

Storage:

Store below 25°C, in the original package. Keep out of reach of children.

Shelf life after the first opening:

Stated on the package.

Packaging:

30g
