

Bioflex^{plus}®

Content Per Capsule:

GLUCOSAMINE Sulfate 2KCl - 750 mg
CHONDROITIN Sulfate - 100 mg
GINKGO BILOBA Extract - 50 mg
MSM (Methyl Sulfonyl Methane) - 40 mg
BOSWELLIA SERRATA Extract - 20 mg

Ingredients: Glucosamine sulfate (D-glucosamine sulfate potassium chloride) (from **crustaceans**); bulking agent: microcrystalline cellulose; bovine gelatin; chondroitin sulfate (chondroitin sulfate sodium salt) (from **fish**); Ginkgo Biloba leaf extract (Ginkgo biloba L.) DER 4:1; methylsulfonylmethane; Boswellia Serrata resin extract (Boswellia serrata Roxb. ex Colebr) DER 4:1; colour: calcium carbonate; anti-caking agent: magnesium salts of fatty acids; modified starch.

Bioflex plus is a combination of Glucosamine and Chondroitin, MSM, Boswellia Serrata and Ginkgo Biloba Extracts.

Glucosamine sulfate and Chondroitin Sulfate are two natural substances found in the tissue of the joints.

Glucosamine is a natural element formed in our bodies from glucose. With age, the amount of Glucosamine that our bodies create decreases.

As a result, cartilage and bones begin to get damaged, as well as joints because lubricants and synovial fluid decrease.

Glucosamine helps the formation and repair of cartilage.

Chondroitin (a carbohydrate) is a component of the cartilage, which prevents water penetration into tendons and joints. It prevents joints destruction and helps the mechanical characteristics of the joints.

MSM (Methyl Sulfonyl Methane) is a source of organic sulphur, which takes part in collagen formation.

Boswellia Serrata is a plant that has anti-inflammatory and anti-cancer properties. It is also used to help the functioning of the joints and their mobility.

Ginkgo biloba helps maintain the proper brain performance in elderly people.

Bioflex Plus is used in the symptomatic treatment of osteoarthritis. Helps pain relief and increased joint mobility. It is also used for promoting the recovery process after traumas.

Bioflex plus reduces the symptoms of Osteoarthritis - the most widespread type of degenerative joint diseases: joint pain, stiffness, reduced flexibility and gradual deformation of the affected joint.

Special warnings and precautions for use:

Glucosamine may increase insulin resistance. Those with type 2 diabetes and those who are overweight and have problems with glucose tolerance should have their blood sugars carefully monitored if they use glucosamine supplements. Because of insufficient safety data children, pregnant women and nursing mothers should avoid using glucosamine.

The product contains fish and crustaceans derivatives.

Recommended daily dosage:

Adults: take 1 - 2 capsules daily, or as directed by a physician.

Storage conditions:

Store in a cool and dry place at 15-25°C. Keep out of the reach of children.

Packaging:

15 Capsules in blister
4 blisters with packaging leaflet in a carton box.
