

Bioflex[®]

60 Effervescent Tablets

plus

Each tablet contains:	
Glucosamine sulfate	750 mg
Chondroitin sulfate	600 mg
MSM	300 mg
Calcium (as Calcium Carbonate)	200 mg (500 mg)
Vitamin C	90 mg
Ginger Extract	20 mg
Vitamin D3	10 mcg (400 IU)

Ingredients: Citric acid anhydrous, Sodium hydrogen carbonate, Glucosamine sulfate, Chondroitin sulfate, Maltodextrin, Calcium carbonate, Methylsulfonylmethane, Sorbitol, L-Ascorbic acid, Polyethylene glycol, Orange flavouring, Acesulfame K, Extract Ginger, Aspartame, Cholecalciferol.

Bioflex® reduces the symptoms of Osteoarthritis - the most widespread type of the degenerative joint diseases: joint pain, stiffness, reduced flexibility and gradual deformation of the affected joint.

Glucosamine sulfate and Chondroitin Sulfate are two natural substances found in the tissue of the joints. Glucosamine is a natural element formed in our bodies from glucose. With age, the amount of Glucosamine that our bodies create decreases. As a result, cartilage and bones begin to get damaged, as well as joints because lubricants and synovial fluid decrease. Glucosamine helps the formation and repair of cartilage. Chondroitin (a carbohydrate) is a component of the cartilage, which prevents water penetration into tendon and joints. It prevents joint destruction and helps the mechanical characteristics of the joints. MSM (Methyl Sulfonyl Methane) is a source of organic sulphur, which takes part in collagen Synthesis. Ginger Extract has a favourable effect on joint bloating and pain. Vitamin C building bone density. Vitamin D3 encourages the absorption and metabolism of phosphorus and calcium. Calcium promotes the growth and health of bone.

Bioflex® is recommended for:

- In case of premature (early) wearing out of the joints;
- Promotes recovery process after traumas;
- In case of joint tension and pain.

Warning:
Glucosamine may increase insulin resistance. Those with type 2 diabetes and those who are overweight and have problems with glucose tolerance should have their blood sugars carefully monitored if they use glucosamine supplements. Because of insufficient safety data, children, pregnant women and nursing mothers should avoid using glucosamine.

Recommended daily dosage:
Adults: Take 2 tablets a day, dissolved in a glass of water, or as directed by a physician.
Do not exceed the recommended daily dosage.
This product is a food supplement. Do not use it as a substitute for a varied diet.
Recommended usage period:
From 3 to 6 months. This period can be extended up to a physician prescription.
Storage Condition:
Keep the tube tightly closed in a dry and cool place at a temperature below 25°C, out of the reach of children.
Packaging:
Each box contains three tubes of 20 Effervescent tablets.

Marketing Authorization Holder:
BioActiveT Pharma, United Kingdom
