

Active ingredient	Amount per 10ml	% NRV
Vitamin C (ascorbic acid)	80mg	100%
Vitamin D3 (cholecalciferol)	10mcg (400IU)	200%
Vitamin B6 (pyridoxine hydrochloride)	1.4mg	100%
Folate (from Quatrefolic®, (6S)-5-Methyltetrahydrofolic acid, glucosamine salt)	200mcg	100%
Vitamin B12 (cyanocobalamin)	2.5mcg	100%
Iron (from Lipofer®, ferric pyrophosphate)	20mg	143%
Zinc (zinc citrate)	6mg	60%
L – lysine (L – lysine hydrochloride)	100mg	*

NRV – Nutrient Reference Values
* NRV not established

Ingredients: Iron (from Lipofer®, ferric pyrophosphate), L – lysine hydrochloride, ascorbic acid, zinc citrate, pyridoxine hydrochloride, cyanocobalamin, folate (from Quatrefolic®, (6S)-5-Methyltetrahydrofolic acid, glucosamine salt), cholecalciferol, purified water, glycerine, fruit pulp, cherry aroma, citric acid, guar gum, xanthan gum, potassium sorbate, dl- α -tocopherol acetate, sucralose.

BioGentle Iron Advanced syrup is a potent dietary supplement that helps to prevent iron deficiency, it is fortified with vitamin C which supports iron absorption.

BioGentle Iron Advanced syrup is a unique dietary supplement with Lipofer® (microencapsulated source of iron), which is designed to provide high iron bioavailability and stability, while minimizing side effects to the body. Quatrefolic®, 4th generation folic acid, is the most bioavailable and stable form of folic acid, and acts directly and independently of enzymes, without being metabolized in the body.

B Vitamins support energy production by aiding in the metabolizing of fats, carbohydrates, and proteins. Help to absorb the amino acid lysine through the intestine. B vitamins are also needed for nerve cells and red blood cells, and to make DNA.

Vitamin D is essential for maintaining healthy bones and muscles, helps the body to absorb calcium and phosphorous, boosts the immune system, vitamin D may also support erythropoiesis.

Zinc supports the immune system, wound healing, and normal growth and development during pregnancy, childhood and adolescence. Zinc also essentially regulates the process of erythropoiesis in the bone marrow.

Lysine is an essential amino acid that may help to stimulate growth hormone (GH) release, helps in the synthesis of collagen tissue and improve immunity; it may facilitate the absorption of calcium from the small intestine. Lysine is also an appetite-stimulant.

Directions:

Below 1 year old: as recommended by the physician.

Children (1 – 3 years): 5ml daily, Children (4 years– 12 years): 10ml daily, Adults and children 13 years and above: 20ml daily, or as directed by a physician. Take with food. SHAKE WELL BEFORE USE.

WARNING:

If you are pregnant, nursing, taking any medications, or have any medical condition, consult your doctor before use.

Discontinue use and consult your doctor if any adverse reactions occur.

Accidental overdose of iron-containing products is a leading cause of fatal poisoning in children under six.

In case of accidental overdose, call a doctor or Poison Control Center immediately.

Storage:

Store in the original package at a temperature below 25°C. Keep out of the reach of children.

Packaging:

The product is packed into a PET bottle of 200 ml volume, closed with a Child – Resistant plastic cap, with a packaging leaflet in a carton box. The product also contains a measuring cap.

Marketing Authorization Holder:
BioActiveT Sp. z o.o.
