

BIOVITA

Omega 3 With Honey

Syrup

Food Supplement – Syrup With Fish Oil, Honey,
Vitamins A, B12, C, D, E, Lysine and Folic Acid

NO ADDED ARTIFICIAL AROMAS, SWEETENERS OR PRESERVATIVES

Ingredients: honey 74%, concentrated pear juice, fish oil 4.5%, L-Lysine, concentrated lemon juice, natural aroma, vitamin C, emulsifier: polysorbate 20, vitamin E (alpha-tocopheryl acetate), vitamin A (retinyl palmitate), vitamin D, vitamin B12, preservative: potassium sorbate, rosemary extract, essential citrus oil, folic acid.

Instructions for use:

1 year old and above: 2 X 5ml (10ml) daily.

The recommended daily allowance is 10ml

Take preferably after a meal, without any other substances added, or enjoy it as a supplement to tea, juice or mashed food. Shake before use.

Natural honey gets crystallized. In case the syrup turns solid, heat it up to 40°C; all active natural ingredients will be preserved at this temperature.

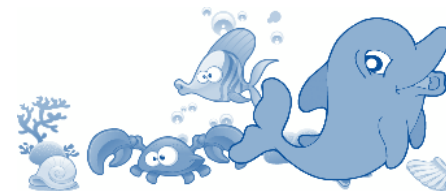

Caution: In case of any allergic reactions to the syrup, stop using the product immediately. Recommended daily allowance of the syrup must not be exceeded. A nutrition supplement cannot entirely substitute a well-balanced diet. Keep the bottle away from children!

Keep in a dark and dry place at the maximum room temperature of 25°C.

Nature's treasure from the beehive

Based on rich experience and knowledge, Medex has been discovering the inexhaustible treasures of the beehive and using them in its products since 1954. We are proud to maintain and contribute to the beekeeping tradition and the tradition of obtaining bee products. Tradition is the source of our inspiration. We combine this with high manufacturing standards and use ingredients of proven quality, relying on innovation and knowledge to deliver carefully developed products. Through these products you will discover the secret which turns the efforts of hard-working bees into a veritable miracle of nature.

Honey is a sweet gift of nature made by bees from flower nectar (nectar honey) or from the secretions of the insects that are left on trees in the form of a sticky fluid (manna honey). Nectar honeys include floral, black locust, chestnut, linden and rapeseed honey, while manna honeys include forest honey as well as fir, maple, oak tree and pine honey. The bees process the nectar or manna, enrich it with secretions from their glands, and then store the fluid and let it mature in the honeycomb. Honey is a supply of solar energy and life fuel in a beehive. It contains valuable nutrients and is therefore regarded an excellent nourishing and beauty product.

Omega-3 are long-chain polyunsaturated fatty acids like DHA (docosahexaenoic acid) and EPA (eicosapentaenoic acid). Human body can synthesise EPA and DHA from alpha-linolenic acid but the synthesis is too slow and inefficient. Therefore it is recommended to consume EPA and DHA as a food supplement. The mentioned fatty acids are synthesised by phytoplankton, which is eaten by fish. It makes fish oil a great source of omega - 3 unsaturated fatty acids, among which DHA and EPA are especially important.

Folate contributes to normal blood formation.

Vitamin A contributes to the normal iron metabolism and to the maintenance of normal vision.

Vitamin B12 contributes to the normal red blood cell formation and to the reduction of tiredness and fatigue.

Lysine helps the body absorb calcium and increase in height and weight.

Net quantity: **140 ml**
